

Getting Started with SDS Manager

How do I migrate/import our current file-based SDS library to SDS Manager?

If you have your SDS stored in another SDS Management system read this article on [how to migrate from another vendor to SDS Manager](#).

If you currently have your SDS files stored on a file-share, you can easily import all your SDSs to SDS Manager.

You can simply zip your folders with SDS-files and import them to SDS Manager.

If you have the SDS-files stored in a folder hierarchy, you can zip the whole folder structure and we will automatically create a matching location structure and add the SDSs to each location in the same way you have then on your file system. When SDS Manager imports the SDS files, we will analyze them and extract all the content found in the SDS tiles and make them available for you in your new SDS library. It is pure magic, and SDS Manager is the only company that have such an import feature.

Click here to [open SDS Manager to import your zip file \(require login\)](#).

When SDS Manager imports your ZIP file, the locations are automatically created and the SDSs are added to the corresponding locations:

Getting Started with SDS Manager

- ▼ Building X (14)
 - Hazardous Area (30)
- ▼ Department Y (4)
 - MT (10)
 - Main Lobby (3)
- ▼ String Unit (29)
 - ▼ Lab B (0)
 - Lab A (0)
- Department Z (13)

After importing, you will be notified about all SDSs which are outdated and should be updated with the newer version we have in our database.

To upload a single SDS file, open the "Manage SDS Library" option and press the "ADD" button. In the dialog shown below you can drag and drop your file or browse in your system to add a SDS-PDF file to your SDS library

Click here to [open SDS Manager to add a single SDS-PDF file \(require login\)](#)

The screenshot displays the SDS Manager interface. On the left is a sidebar with navigation options: Dashboard, All my SDSs, My locations, Manage SDS Library (highlighted with a red box), Benedict GmbH (9), ISAVIA (59), SDSes (98), WAYFINDER FAMILY S... (35), Add location, Import status, SDS requests, Archive, Global SDS Search, SDS compliance, Manage QR codes, Substitutions, and Risk assessment. The main content area shows the 'SDS Library for Company H > SDSes' with a search filter and tabs for General, Hazard, Revision, Risk, and Personalized view. A notification states: 'We discovered issues with one or more files during import. See details on the Import status page'. Below this is a table of SDS entries:

Product Name ↑	Supplier Name	Location	Signal word	Amount	Pictograms & Controls	Substance hazard	Actions			
						H	S	E		
DAZZLE SHINE GLASS CLEANER	National Purity US LLC	SDSes	Danger	N/A		H2 S2 E1				
DUXOLA POWER GEL	KREFTING & CO. AS	SDSes	Advarsel	N/A		H2 S1 E1				
Ethylene Glycol (MOPAR CONCENTRATE ANTIFREEZE/COOLANT 10 YEAR/150,000 MILE - EMBITTERED)	Not Available	SDSes	DANGER	N/A		H5 S1 E1				

At the bottom of the table, there is a blue button labeled '+ Add Safety Data Sheet' (highlighted with a red box). The footer of the interface shows 'Page 2 / 3' and '© 2024 SDS Manager <eb@aston.no> | 2024-12-04 08:58'.

Getting Started with SDS Manager

Add substance to SDSes [Close]

Search for Safety Data Sheet in our database of 13Million+ Safety Data Sheets.

Product, Supplier, CAS#, UFI#, EU No. [Search] [Advanced search]

Recently added

Shell Rimula R6 LM 10W-40 ISAVIA	[H1] [S1] [E1]
Flügger Floor Varnish 45 ISAVIA	[Ekkert] [H1] [S1] [E1]
Hempel's Uniprimer ISAVIA	[Hætta] [H5] [S2] [E3]

Already have the PDF-file of the Safety Data Sheet you want to add to your library? [Info]

You can also add the Safety Data Sheet to your library by simply uploading the PDF-file.

Drag and drop

[Browse File](#) [Info]

Show other methods to add Safety Data Sheets to location [Dropdown]

If you already have SDS-binders (PDF files that contain multiple SDS files) for each of your locations, you can simply upload the SDS-binder file to a location in your SDS library.

We will automatically read the PDF you import and detect which SDSs are in the file and add them to the location.

With this method, you can populate your SDS library with thousands of SDSs in a matter of minutes. The only requirement is that you have an SDS-binder for each location in your company.

If you do not have any SDS file but have XLS or CSV file with your substances instead, the list can be imported to SDS Manager. Let us know if you prefer to build your SDS library by importing your product inventory and we will help you import the data.
