

SDS Inventory Manager in use

What do I do with SDS for chemicals that we no longer use (Archive SDS)?

Chemicals that you no longer use can be archived from a location. Here is how to do that:

Open 'All my SDSs' or 'Manage SDS Library' page and find the SDS.

Click on 'More actions' icon in the Actions column, select 'Move to archive' and confirm.

The archived substances will be seen in the 'Archive' page.

Click here to [open SDS Manager and access your archived SDSs \(require login\)](#).

On the archive page, you can permanently remove a Safety Data Sheet (SDS) from your library. Simply click "Delete Permanently" next to the SDS you wish to eliminate.

SDS Inventory Manager in use

The screenshot shows the SDS Inventory Manager interface. On the left is a sidebar with navigation options: Dashboard, All my SDSs, My locations, Manage SDS Library (expanded), Test Nam Dau (6), Add location, Import status, Archive (highlighted with a red box), Global SDS Search, and SDS compliance. The main content area has tabs for Archived locations, Archived SDSs (highlighted with a red box), Replaced by newer version, and Archived SDS Requests. Below the tabs is a search bar for 'Product, supplier' and a 'Location Filter' button. A table lists SDS entries with columns: Product Name, Supplier Name, Product Code, Revision date, GHS, Locations, Replaced by SDS, Replaced by, and Replaced date. The table contains four rows of data. The first row is 'Kroon-Oil Oil Flush' with revision date 2018-12-27 and three GHS hazard icons. The second row is 'Kroon-Oil Oil Leak Stop' with revision date 2018-12-27 and two GHS hazard icons. The third row is 'Kroon-Oil Oil Stabilizer' with revision date 2020-07-27 and one GHS hazard icon. Each row has 'Undo Archive' and 'Delete permanently' (highlighted with a red box) buttons. A 'Bulk Action' dropdown menu is visible in the top right corner, currently set to 'Delete permanently'.
