How can I check if any of the products we use contains restricted chemicals?

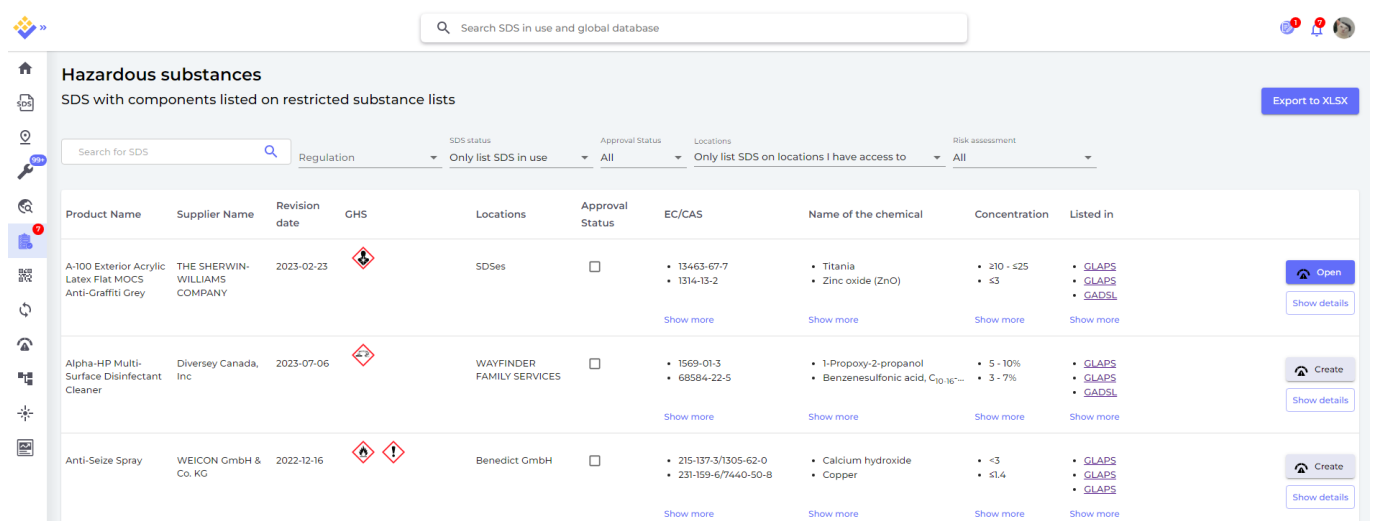

SDS Manager has an overview of all chemicals listed on restriction lists like ZDHC, California Proposition 65, REACH and more.

The substances in these lists are identified with either EC or CAS number.

SDS Manager will extract the CAS and EC numbers from section 3 of the SDS you use and check if these numbers are found in any of the restriction list.

In SDS Manager, you will be able to list all the SDSs you have in your SDS Library that have restricted components.

Below is an example of how we list products with components on restricted list:

The screenshot shows the 'Hazardous substances' section of the SDS Manager interface. It features a search bar at the top, a navigation sidebar on the left, and a main table of products. The table columns include Product Name, Supplier Name, Revision date, GHS, Locations, Approval Status, EC/CAS, Name of the chemical, Concentration, and Listed in. Three products are listed, each with a GHS hazard symbol and a 'Show more' link. The first product is 'A-100 Exterior Acrylic Latex Flat MOCs Anti-Graffiti Crey' with a GHS 09 symbol. The second is 'Alpha-HP Multi-Surface Disinfectant Cleaner' with a GHS 05 symbol. The third is 'Anti-Seize Spray' with a GHS 02 symbol. Each product row has an 'Open' or 'Create' button and a 'Show details' link.
