

SDS Inventory Manager in use

How can I edit the product name on an SDS?

In SDS Manager, you can edit the product name and any other information extracted from the Safety Data Sheet file.

To edit information, simply enter the SDS detail mode and hover on the text you want to change. See below picture on how this is done.

The screenshot displays the SDS Manager interface for the product '1,2-Dichlorobenzene' by AccuStandard, Inc. The interface is divided into several sections:

- Warning:** A blue banner at the top with the product name and a pencil icon for editing. A red arrow points to this icon with the text "Click on the pencil to edit Product name".
- Product Information:** A section containing hazard icons, a 'Need approval' button, and risk ratings (Health, Safety, Environmental).
- General Information:** A table with the following data:

General Information	
Product name:	1,2-Dichlorobenzene
Product Synonyms:	
Chemical Formula:	C6H4Cl2
CAS N°:	95-50-1
Date of Issue:	2021-06-24
Icons in PDF:	
Customized:	
.txt:	
No.:	
- Company Information:** A section with the supplier name 'AccuStandard, Inc'.
- Right Sidebar:** Contains 'Revision', 'Risk', and 'Custom Fields' tabs. A red arrow points to a document icon in the 'Actions' section with the text "Click here to open SDS detail".

You can also add a new name to a product as Synonym. The benefit of using Synonyms is that an SDS then can be found both using the original product name in the SDS and the synonym you add.
