How can I track chemical use and disposal and report to EPA?

The most efficient method for employees to record usage is to scan QR codes on secondary container labels.

The labels have QR code that allow user to scan and record arrival of new material, usage or disposal.

By default Labels to not show QR codes for tracking chemical useage.

To show the QR codes for tracking chemical useafe you must enable it on the [Settings page](#) (require login).

Daily use

Settings

- SDS Approval functionality
- Show chemical tracking QR code on labels. Allow recording of chemical usage using QR codes
- Automatically update SDS to new versions
- Employee SDS search: Show search result from global database if SDS is not found in Company SDS library
- Default imported PDF files to Private

SDS Manager allows tracking of chemical new purchase, usage (1) and disposal (2). Users can also move chemical amounts to another location, typically used when a large container is split into multiple containers for distribution to other locations.

Reports can be made for regulatory reporting based on the recorded information.
