

Daily use

How to administer notifications from SDS Manager.

On your [SDS Manager account](#), you can activate the following email notifications

- New SDS Request
- Message from SDS Manager
- Message from vendor
- New revision of an SDS
- SDS has automatically been upgraded to new version

The screenshot displays the SDS Manager user interface. On the right side, a user profile dropdown menu is open, showing the user's name 'Erlend Bruvik' and organization 'Test Corporation Inc. Pro'. Below the profile, a list of menu items includes 'Manage account', 'Organization profile', 'User management', 'Subscription', 'Go live checklist', 'Impersonate', 'English', 'Invite members', 'Import product lists', 'Settings', and 'Logout'. The main content area shows three expandable sections: 'General Information', 'Security', and 'Email notifications'. The 'Email notifications' section is expanded and highlighted with a red border, showing five notification types with toggle switches: 'New SDS Request', 'Message from SDS Manager', 'Message from vendor', 'New revision of an SDS', and 'SDS has automatically been upgraded to new version'. A 'Save settings' button is located at the bottom of this section.
