

How to keep our SDS library up-to-date

How do I get alerted about new revisions of SDS and how do I upgrade to the latest version?

New revisions of SDSs are issued every 1 to 3 years.

New revisions are issued because of new regulatory requirements, corrections or new discoveries by the suppliers. Users of chemicals are required to have the latest version of the SDS in their library.

SDS Manager are continuously crawling thousands of supplier websites for new revisions of safety data sheets and add them to our database.

When you use SDS manager, you will be alerted when we find new versions of SDSs in your library. In the header bar of SDS Manager, you will see the alert icon showing the number of outdated SDSs you have in your library. In the example below, we have 35 outdated SDSs that need to be updated.

The screenshot shows the SDS Manager dashboard. In the top right header, there is a notification bell icon with a red circle containing the number '10'. In the left sidebar, the menu item 'SDS where newer version exists' is highlighted with a red box and also has a red circle with '10' next to it. The main content area features a 'Welcome to SDS Manager!' message and a section titled '4 ways to add Safety Data Sheets to your library'. Below this is a search bar with the text 'Add Safety Data Sheets by searching for your products in our database with 13Million+ SDSs'. The dashboard also displays four summary cards: 'SDS I have access to' (763), 'Locations I have access to' (38/38), 'Outdated Safety Data Sheets' (10/763, highlighted with a red box), and 'SDS Approved' (14/740). The 'Outdated Safety Data Sheets' card shows a 98% progress indicator.

You can also [enable email-notification](#) that alert you via email when there are new revisions in your library.

When you click on the notification bell, you will be directed to ["SDS where newer version exists" page](#) where we will list SDSs you have in your library for which we found newer versions.

Click here to [open SDS Manager to review SDS where newer version exists \(require login\)](#)

How to keep our SDS library up-to-date

Product Name	Product Code	Revision date	Revision date newer version	Locations	
MELMENT F 10		2018-08-20 → 2020-01-15		Lab B	<button>Diff.</button> <button>Upgrade to new version</button>
Navistar Fleetrite Diesel Exhaust Fluid	FLTFP (2.5 Gal); FLTQ (55 Gal); FLTFR (275 Gal); FLTFS (330 Gal)	2012-03-26	2018-06-01	Lab E	<button>Diff.</button> <button>Upgrade to new version</button>

Click on the "Diff." button to see side-by-side changes between the SDS you are currently using and the new version.

Changed values	Current version	New version

Section 3: composition/information on ingredients	According to Regulation 2012 OSHA Haz CAS Number 50-00-0 Weight % < 0.1%	According to Regulation 2012 OSHA Haz Formaldehyde CAS Number: 50-00-0 Content (W/W): < 0.1% Synonym: Formaldehyde; Forma
First-aid measures after ingestion	Rinse mouth immediately and then drink plenty of water, seek medical attention. Do not induce vomiting unless told to by a poison control center or doctor.	Immediately rinse mouth and then drink 200-300 ml of water, seek medical attention. Do not induce vomiting unless told to by a poison control center or doctor.

You can choose to upgrade one SDS at a time (1) or upgrade all SDSs to the latest version in one operation (2).

Auto-pilot

You can also enable the Auto-pilot- feature "Automatically update SDS to new versions". When this setting is enabled your SDS are automatically updated to new revisions. You can [activate the email notification](#) to ensure that you get notified about such updates.
