

# How to keep our SDS library up-to-date

## How can I edit the product name on an SDS?

In SDS Manager, you can edit the product name and any other information extracted from the Safety Data Sheet file.

To edit information, simply enter the SDS detail mode and hover on the text you want to change. See below picture on how this is done.

The screenshot displays the SDS Manager interface for the product '1,2-Dichlorobenzene' by AccuStandard, Inc. The interface features a blue header with a 'Warning' banner and a pencil icon next to the product name. Below the header, there are hazard icons, a 'Need approval' section with an 'Approve' button, and risk rating matrices for Health, Safety, and Environmental risks. The main content area is a table with the following data:

General Information	
Product name:	1,2-Dichlorobenzene
Product Synonyms:	
Chemical Formula:	C6H4Cl2
CAS №:	95-50-1
Date of Issue:	2021-06-24
Icons in PDF:	
Customized:	
.txt:	
No.:	

Below the table is the 'Company Information' section, which includes the supplier name 'AccuStandard, Inc'. A red arrow points to the pencil icon next to the product name with the text 'Click on the pencil to edit Product name'. Another red arrow points to a document icon in the right sidebar with the text 'Click here to open SDS detail'.

You can also add a new name to a product as Synonym. The benefit of using Synonyms is that an SDS then can be found both using the original product name in the SDS and the synonym you add.
