How to find an SDS in our SDS-library

To find SDS for a product in your SDS library, simply enter a few keywords from the product name, supplier name or product code.

The screenshot shows the 'SDS Library for Owner X' interface. At the top, there is a search bar containing the text 'accu' with a magnifying glass icon to its right. Below the search bar is a 'Filter' button with a funnel icon. Underneath are five tabs: 'General' (highlighted in blue), 'Hazard', 'Revision', 'Risk', and 'Custom Fields'. The main content area displays two search results. The first result is for '1,2-Dichlorobenzene' with the supplier 'AccuStandard, Inc' highlighted by a red box. It is categorized as 'Hazardous Area' with a quantity of '100 (kg)'. The hazard classification is 'Warning' with codes 'H4', 'S1', and 'E1'. Below the codes are several hazard pictograms: a red diamond with a white exclamation mark, a red diamond with a black silhouette of a person, a blue diamond with a white silhouette of a person, a blue circle with a white exclamation mark, a red circle with a white slash, a blue circle with a white document, a green square with a white plus sign, and a red square with a white skull and crossbones. At the bottom of the result are icons for PDF, edit, tag, pencil, share, add, and a red warning icon, followed by a vertical ellipsis. The second result is for 'Benzene' with the supplier 'AccuStandard, Inc' also highlighted by a red box. It is categorized as 'Hazardous Area'. The hazard classification is 'Danger' with codes 'H5', 'S3', and 'E1'. Below the codes are three hazard pictograms: a red diamond with a white flame, a red diamond with a white exclamation mark, and a red diamond with a white silhouette of a person. At the bottom of the result are the same icons as the first result, followed by a vertical ellipsis.

For cases where no SDS is found in your SDS library with the search keywords, you can redo search by using our global database of 13Million+ safety data sheets.
