

# Users and QR code posters

## Use enumerated custom field value to control what SDS an QR code poster is linked to

The primary function of a QR code poster (user) is to gain access to SDS linked to a Site/location.

Building A	Read Only
Building B	Read Only
Demo location	
> Factory Miami	
> Factory Paris	

SDS Manager offers an alternative method to link SDS to as QR code poster/user:

The screenshot displays the 'Manage Location Access' interface. At the top, there are settings for 'Language' (English) and 'Access setting' (Customize access). A red box highlights the 'Advanced access' button. Below this, a modal window titled 'Advanced access' is open. It contains a dropdown menu for 'Custom fields of enumerated type' with 'Department' selected (highlighted by a red box). To its right, a 'Custom field value' dropdown shows 'Department South, Department East' selected. A list of options is shown below: 'Department North' (unchecked), 'Department South' (checked), and 'Department East' (checked). A 'Save' button is visible to the right of the value dropdown.

In the above example, we have created an Enumerated custom field named "Department".

On the SDS Detail page, we can select the Department in which the product is used.
