

SDS Inventory Manager in use

How can our employees find the SDS for a chemical?

If the SDS is already added to your organization's SDS library, your employees can easily and quickly find the SDS in the search bar from the 'Dashboard.'

The screenshot shows the SDS Manager Dashboard. On the left is a navigation menu with items like 'Dashboard', 'All my SDSs', 'My locations', 'Manage SDS Library', 'Global SDS Search', 'SDS compliance', 'Substitutions', 'Risk assessment', 'Job procedures', 'My job procedures', 'Exposures', and 'Reports'. The main content area is titled 'Dashboard' and features a 'Welcome to SDS Manager!' message with several action buttons: 'Add SDSs to your library', 'Create location structure', 'Import your existing SDS files', 'Print poster for QR login', 'Invite colleagues', 'Open help center', and 'Schedule a demo'. A QR code is displayed with the text 'Check what your employees will see'. Below this is a search bar labeled 'Find Safety Data Sheets for your products' with a search icon and the placeholder text 'Product, Supplier, CAS#, UFI#, EU No.'. At the bottom, there are two summary cards: 'SDS I have access to' showing '195' with a 'Show my SDSs' link and an 'Add substances to my library' link; and 'Locations I have access to' showing '12/12' with a 'Show my locations' link and a '100%' progress indicator.

Or you can also find the search bar in 'All my SDSs' page:

The screenshot shows the 'All my SDSs' page. The left navigation menu is the same as in the dashboard. The main content area is titled 'SDS Library for Company X' and features a search bar with the placeholder text 'Filter by Product name, Supplier, CAS# or UFI#'. Below the search bar are tabs for 'General', 'Hazard', 'Revision', 'Risk', and 'Custom Fields'. The main content is a table with columns: 'Product Name', 'Signal word', 'Amount', 'Pictograms & Controls', 'Substance hazard', and 'Actions'. The table contains two entries: one for '<=0.1% HCL/Air' with a 'Warning' signal word and another for '= 0.1 mol/l (0.1 N) Titrisol' with a 'Danger' signal word. Each entry has associated pictograms and hazard codes (H3, S4, E1 for the first; H3, S5, E5 for the second).

Alternatively, employees can scan QR codes on secondary container labels.

Emergency agency name: CHEMTREC

Emergency agency phone number: 1-800-424-9300

The labels have QR code for easy access to the SDS file (1) and to record arrival of new material, usage or disposal (2).

We recommend that you post QR codes to access your SDS library. This ensures that employees always have easy access to SDS and avoid problems with users that do not remember their password, etc.

Please scan the below QR code with your mobile phone to see what your employees will see when they access SDS library via QR code.

SDS Inventory Manager in use

Typically, our customers post QR code on the wall where employees use chemicals to ensure that employees know how to access the SDSs.

With SDS Manager, you can also have a link on your intranet to directly open the SDS library for easy access.
