

SDS Inventory Manager in use

How can I check if any of the products we use contains restricted chemicals?

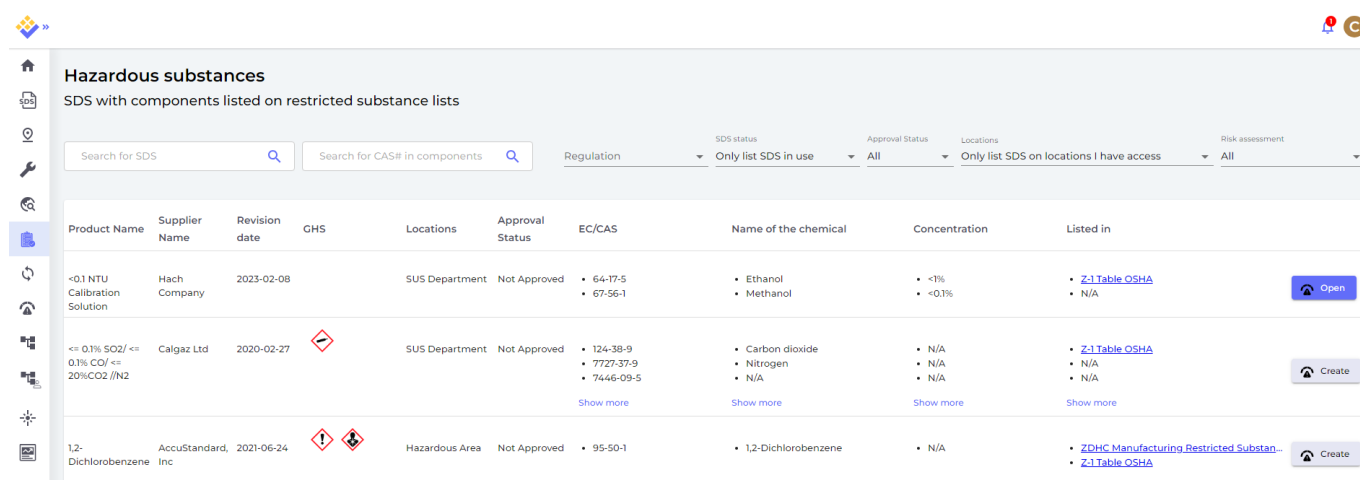

SDS Manager has an overview of all chemicals listed on restriction lists like ZDHC, California Proposition 65, REACH and more.

The substances in these lists are identified with either EC or CAS number.

SDS Manager will extract the CAS and EC numbers from section 3 of the SDS you use and check if these numbers are found in any of the restriction list.

In SDS Manager, you will be able to list all the SDSs you have in your SDS Library that have restricted components.

Below is an example of how we list products with components on restricted list:

The screenshot shows the 'Hazardous substances' section of the SDS Manager interface. It features a table with columns for Product Name, Supplier Name, Revision date, GHS, Locations, Approval Status, EC/CAS, Name of the chemical, Concentration, and Listed in. The table lists three products: 1) A calibration solution from Hach Company, 2) A gas mixture from Calgaz Ltd, and 3) 1,2-Dichlorobenzene from AccuStandard Inc. Each product row includes details on its GHS status, locations, approval status, and any restricted components found in the SDS. The interface also includes search bars, filters, and action buttons like 'Open' and 'Create'.

The above list is a prospective list of products that you need to assess.

When you have verified that the content is acceptable, you may want to mark the SDS as 'Approved'
