# How can I use SDS Manager to document job/work procedures for hazardous chemicals?

In SDS Manager, you can create Job procedure according to REACH, OSHA and COSHH.

A job procedure typically is used to describe a work procedure involving chemicals, but it is also possible to create work procedures that does not include any chemicals only using non-substance related hazards e.g. Electrical hazards.

A job procedure have the following GENERAL information: Frequency of the Job procedure, Description of the procedure, Description of the job steps and Description of the hazards

Job procedure: Priming			Create new revision
Risk rating	Risk rating after controls	Storage risk after controls	PPE/Controls
H S E	H S E	S E	
H4 S2 E2	H3 🥵 🖨	<b>a</b>	<ul> <li>3</li> <li>3</li> <li>4</li> <li>5</li> <li>5</li> <li>5</li> <li>5</li> <li>5</li> </ul>
General Locations & Us	ers Substances Non-substance related	safety hazards Exposure	
Description of procedure	(Press enter to save)	Description of Job steps (Press ent	er to save)
Priming of epoxy floors		Blend the two components 1:10 mix thorougly	
Description of Hazards (P	ress enter to save)	Description of Controls (Press ente	r to save)

You may want to link a job procedure to a location and or users.

General Locatio	ons & Users Substances	Non-substance	related safety hazards	Exposure	
Location where job pr	rocedure is performed				
Location	Start date	End date	Responsible	Storage risk after controls	
Factory Paris	2024-01-01		Erlend Bruvik	S E	Î
Users performing the	job procedure 🛛 🕂				
Full name				Read date	
Demo User NZ	-				Î
Demo User AU	-				Î
Demo User UK					Î
Demo user US				2023-03-27	Î

When you link users to a Job procedure, the user will receive an email requesting the user to review the Job procedure and to click the "Confirm I have read" the procedure. This help you document that procedures are read by involved users.

Job procedure notification: You have been added to a new job procedure

Hi Erlend Bruvik,

You have been added to Job procedure Priming epoxy floor. Please visit <u>SdsManager - Inventory Management</u>, read the job procedure thoroughly, and press the "Confirmed read" button on the Job procedure once you have read it.

Kind regards,

The Job procedure can be linked to one or more risk assessed chemicals (SDSs). Only risk assessed SDS can be linked to the Job procedure. I.e. you are creating a Job procedure involving e.g. 2 chemicals, you first create Chemical risk assessment for each of the two SDSs and then link the risk assessed chemicals to the Job procedure

lob procedure: Priming ep	ooxy floor 📝				Create nev	w revision
requency of job procedure: Daily	<b>v</b>				Cleate ne	w revision

General Locations & Users Substances used in the job proce Product Name		Non-substance related s Supplier	afety hazards Exposure Revision da	te Amount	Substance hazard	
Substances used in the job proce	dure		Revision da	te Amount 11	Substance hazard H4 S1 E4 📑	

The risk rating of the Job procedure is calculated as the highest rating found in the linked Chemical risk assessments.

Non-substance related safety hazards can also be added to the Job-procedure.

Below is a list of Non-substance hazards

#### Hazards

#### Non-substance related safety hazards

- Unsafe tools equipment
- Fall hazards
- Entrapment
- Mechanical
- Slip trip hazards
- Obstructions
- Animal droppings
- Lighting
- Electrical
- Mold
- Sharp objects
- Asbestos
- Extreme heat cold
- Awkward postures or lifting
- Working alone
- Confined space

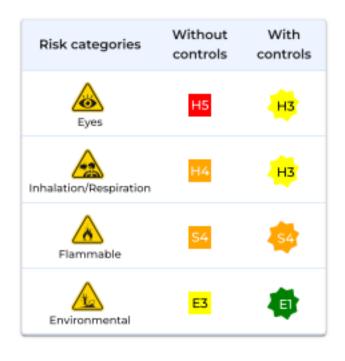

On the Enterprise plan, user can open for exposure registrations for a work procedure

General	Locations & Users	Substances	Non-substance related safety hazards	Exposure				
Exposure set	tings							
Individual	parts of the period						Per date	
	eriod for when the w	ork operation is						
Start date			End date			Repetition		
01/01/2024			🗖 mm/dd/yyyy			Weekly		
Repetitio Repeat eve	<b>n</b> ery 1 weeks on the							
What does it	t apply for?							
Chemical	-							
Asbestos								
Radiation								
Biological								
Processes Select process	or lead and lead compo	ounds where work	ers are or may be exposed to substances, sul	ostance mixtures or	proc	cesses from the list below.		
Substance								

On the Job procedure risk assessment, the risks will be listed for use without PPE and Controls and the risk with Controls.

SDS Manager use a risk classification range from 1-5 for (H)ealth, (S)afety and (E)nvironment where 3 is highest acceptable risk for employees

In below example, we can see that all Health risks are medium high (H3) while the safety risk is very low (S1).

The controls identified on the Job procedure are displayed on any secondary container labels

Page 5 / 8

© 2024 SDS Manager <eb@aston.no> | 2024-05-09 04:34

available for any users of the SDS Inventory Manager.

Comment
Wear cotton suit
Wear protective classes
Do not eat during work procedure
No open flame
Rinse with lots of water for at least 10 minutes if substance is in contact with the skin
Call firedepartment in case of accident

Job procedures can be approved and revised.

Below is an example of a Job hazard analysis created in SDS Manager:
