

User management and access controll

Can I let our employees access SDS library from our intranet?

With SDS Manager, you can create a link that gives read-only access to all or some of your SDS library and publish this link on the intranet. To do this, enable QR login for a user, and use the link embedded in the QR code on your intranet.

[How can I create a QR code poster that employees can use to access our SDS library?](#)
