

User management and access control

Can I assign different roles for people in a location?

Invited users can have Admin Role, Staff or No Access Role.

You are flexible to decide access type on location level. A user can be given an Admin role on one location and read-only access to other locations.

On 'User management' page, you can click on a user/employee and set their roles for each location:

Manage Location Access

Change user role

Admin

Select user

S

Sam Smith

Building X

Hazardous Area

Department Y

MT

Main Lobby

String Unit

Lab B

Lab A

Department Z

HSE

RE Department

SUS Department

No Access

Staff

Admin

Admin with approval

No Access

No Access

Admin

Staff

Staff

Staff

Save

Collapse location tree

Then click 'Save' to save any changes.

- With 'No Access', users cannot see or access the location.
- With 'Staff,' users can see the SDSs (except for hidden ones made by Owner/Admin role) and edit the substance amount.
- With 'Admin', users can see all the SDSs in the location and make changes to them. They can also add more SDSs to the location.
- With 'Admin with approval', users can have 'Admin' permissions and approve SDSs, risk assessments and job procedures.
