

Daily use

How can I do free-text search in text in our SDSs?

On SDS Manager "[All our SDS](#)" page (require login) you can do free text search.

If you e.g. want to find all SDS in your library that contain the string "Alcohol resistant foam. Dry chemical powder", you open "Advanced search" and check "Free text search in whole SDS. Matches found in headings and literals are not included".

To search for an exact string, you can quote the string. The result will show SDS that contains the exact string that you entered.
