How does the revision update work?

New revisions of SDSs are issued every 1 to 3 years.

New revisions are issued because of new regulatory requirements, corrections or new discoveries by the suppliers. Users of chemicals are required to have the latest version of the SDS in their library.

SDS Manager are continuously crawling thousands of supplier websites for new revisions of safety data sheets and add them to our database.

When you use SDS manager, you will be alerted when we find new versions of SDSs in your library.

In our base subscription, we do not guarantee that we will find all new version as some suppliers are not publishing the SDS on their web sites, but we expect to find most of them. We do offer extra service where we do a manual check of all your Safety Data Sheets once a year to make sure that your SDS are on the latest versions on all your SDS.

Often, a product come in a new version, or from a new supplier, and in such cases our system will not be able to automatically link a new version with a new name to the version you are using in your library.

To handle such cases, we recommend that you periodically review older SDS in your library.

On [All our SDS page \(require login\)](#) you can filter your SDSs by revision year (1). This allow you to show a list of SDS that are of old date (2) as shown below.

The screenshot shows the 'All Our SDS' interface. At the top, there are search bars for 'Search for SDS' and 'Search for CAS# in components'. Below these are filters for 'SDS status' (set to 'Only list SDS in use'), 'Approval Status' (set to 'All'), 'Supplier', and 'Revision date' (set to '2018, 2016, 2015', marked with a red box and '1'). The main table lists SDS entries with columns: Product Name, Supplier Name, Product Code, Revision date (marked with a red box and '2'), GHS, Substance hazard (H, S, E), and actions (Replace with new SDS, Add to Location). The first entry is 'AMERCOAT 370 PEARL GRAY RESIN' by 'PPG Industries, Inc' with revision date '2015-06-03'. The second is 'Coal Tar' by 'ArcelorMittal Dofasco, Inc' with revision date '2015-05-27'. The third is 'WD-40 Specialist Motorbike Brake Cleaner' by 'WD-40 Company Limited' with revision date '2015-07-10'. The 'Replace with new SDS' button for the first entry is marked with a red box and '3'.

Product Name	Supplier Name	Product Code	Revision date	GHS	Substance hazard	H	S	E	Actions
AMERCOAT 370 PEARL GRAY RESIN	PPG Industries, Inc	AT370-23	2015-06-03	[GHS Icons]	H5	S5	E5	[Buttons]	
Coal Tar	ArcelorMittal Dofasco, Inc		2015-05-27	[GHS Icons]	H5	S5	E5	[Buttons]	
WD-40 Specialist Motorbike Brake Cleaner	WD-40 Company Limited		2015-07-10	[GHS Icons]	H3	S4	E4	[Buttons]	

Next you click the "Replace with new SDS" (3)

This opens the search window where you can search for the new version. You may want to remove some words in the product name (4) to cover the case where the manufacturer has modified the name used.

Daily use

Find SDS to replace current SDS for AMERCOAT 370 PEARL GRAY RESIN

Search for Safety Data Sheet in our database of 11Million+ Safety Data Sheets.

Q AMERCOAT 370 PEARL GRAY RESIN

Advanced search
