

How to keep our SDS library up-to-date

How do I know when there is an updated version of an SDS?

You will be alerted whenever there is a new revision of your SDSs from our header bar:

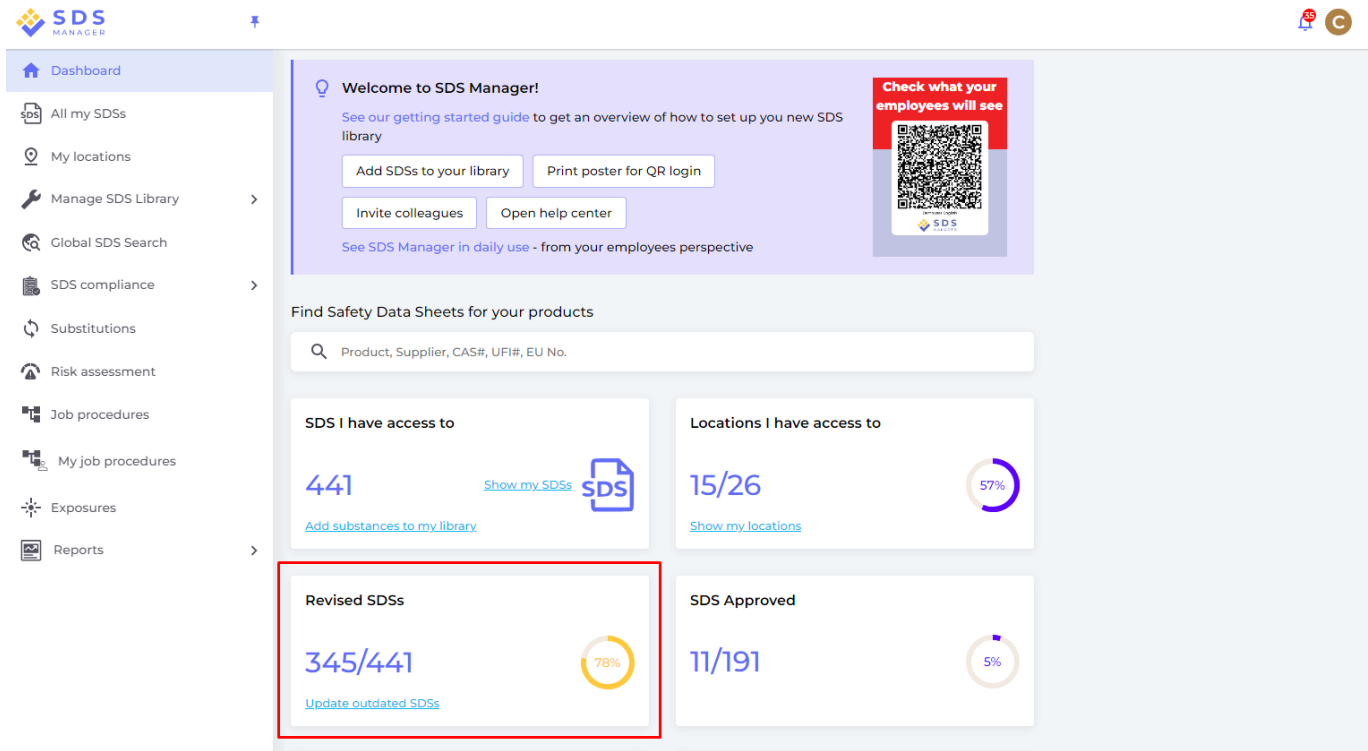

Click on the icon to go to 'SDS where newer version exists page':

Or you can also find the statistics for your SDSs in the 'Dashboard' page.

'Revised SDSs' panel helps you keep track of how many SDSs are updated to the newest versions.

How to keep our SDS library up-to-date
