

How to keep our SDS library up-to-date

How can I check if any of our chemicals are on any restricted chemical list?

SDS Manager has an overview of all chemicals listed on restriction lists like ZDHC, California Proposition 65, REACH and more.

The substances in these lists are identified with either EC or CAS number.

SDS Manager will extract the CAS and EC numbers from section 3 of the SDS you use and check if these numbers are found in any of the restriction list.

In SDS Manager, you will be able to list all the SDSs you have in your SDS Library that have restricted components.

Click here to [open SDS Manager see what SDS in your library that are containing hazardous chemicals \(require login\)](#).

Below is an example of how we list products with components on restricted list:

The screenshot shows the 'Hazardous substances' section of the SDS Manager interface. It displays a table of products with components listed on restricted substance lists. The table includes columns for Product Name, Supplier Name, Revision date, GHS, Locations, Approval Status, EC/CAS, Name of the chemical, Concentration, and Listed in. There are also search bars and filters at the top.

The above list is a prospective list of products that you need to assess.

When you have verified that the content is acceptable, you may want to mark the SDS as 'Approved'
