

# Add SDS to our new library

## How can I use my phone and take pictures of the products I want to add to our SDS library?

A typical way of building a SDS library is to walk around on your organizations premises and create a list of all chemicals that are used.

Using SDS Manager on your phone, you can take a picture of the product label, type part of the product name and press "Save" and continue to the next chemical. With this method you can add 100s of products to SDS Manager in an hour. After you have added the chemicals to SDS Manger, you can start to find Safety Data Sheets for the chemicals. (See [this article](#) how you add administration users that can take pictures on their sites)

Visit [Shoot pictures of labels of you chemicals \(require login\)](#) To take pictures.

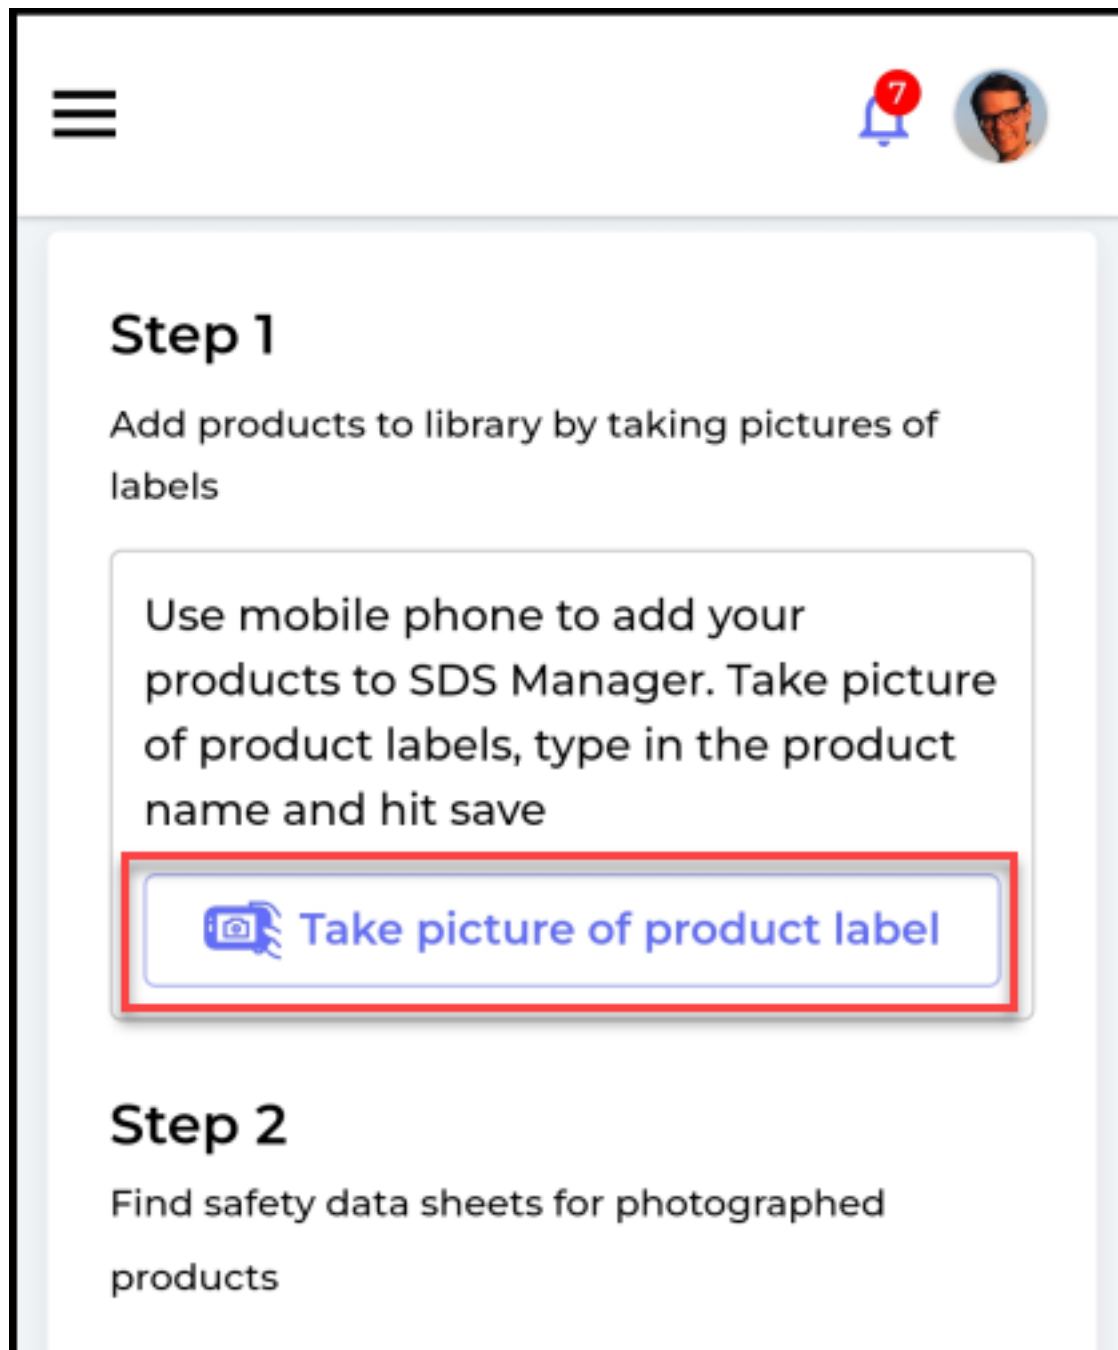

The screenshot shows the SDS Manager web interface. On the left is a sidebar with various icons. The main content area has a light blue header with 'Welcome to SDS Manager!' and a link to 'See our getting started guide'. Below this is a section titled '5 ways to add Safety Data Sheets to your library'. One of the options, 'Shoot pictures of labels of your chemicals', is highlighted with a red box. Below this section, there is a paragraph explaining the typical way of building a SDS library and the benefits of using SDS Manager on a mobile phone. To the right of this paragraph, there is a section titled 'No camera on this device?' with a QR code and a link to 'Take picture of product label'.

A mobile phone is very convenient for taking the pictures. If you currently are using a stationary device, you can scan the QR code on your screen as shown above (valid for 10 minutes after the page is opened) and your session will be transferred to your mobile device where you can start taking pictures.

After you scan the above QR code on your device, the following page will show on your mobile phone. There you click "Take picture of product label" to start adding products by shooing pictures.

You can also click [this link \(require login\)](#) on your mobile phone to open the below page.

# Add SDS to our new library

Take a picture of the label as shown below. If you have multiple locations in your company, you need to select what location the photo is taken.

We recommend that you write part of the product name to make it easier to manage the list of pictures.

Click the Save button to save the product and continue with the next product you want to add to your library.
