

Users and QR code posters

How can I create a QR code poster that employees can use to access our SDS library?

Employees can get read-only access to some SDSs via QR-codes.

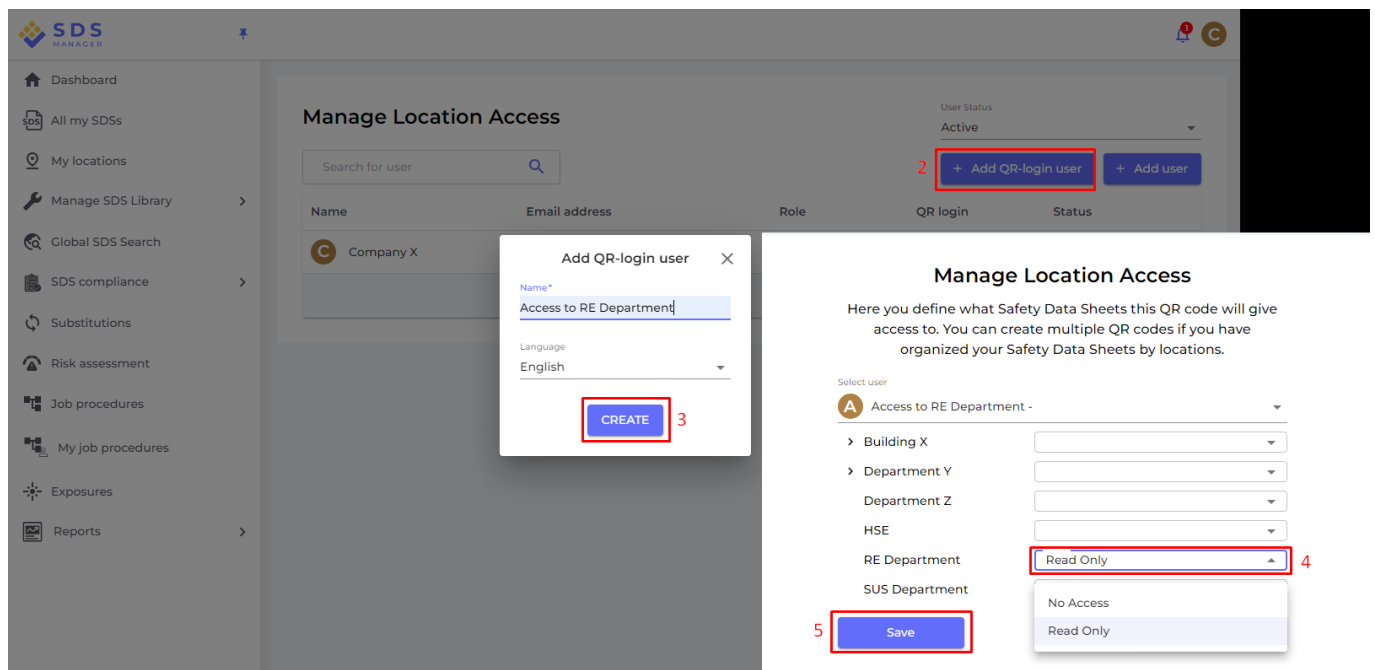

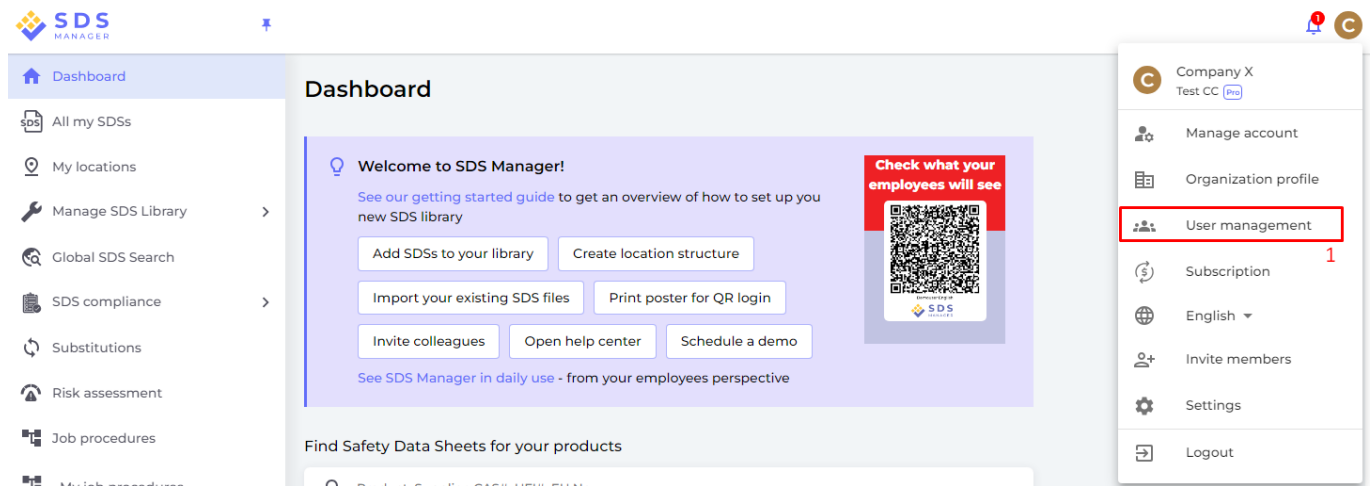

If you have multiple locations, you may want to create a separate QR code for each location so that employees only see the SDSs in their location when scanning the QR code.

To create a QR-code-login do the following steps:

(1) Click here to [open SDS Manager User management page \(require login\)](#)

(2) click on 'Add QR login user' and name the user, then (3) click 'Create'. We recommend you name the account to describe the locations which the QR code have access to. Next, (4) select the locations that you want the QR code to give access to, then (5) click 'Save'. Employees who log in via the QR code login will now have read-only access to the SDSs on selected locations.

Users and QR code posters

When the QR code user is created, you can view the QR code by (1) clicking on the QR code image.

Name	Email address	Role	QR login	Status
 Access to RE Department -		Staff	 1	Active

Rows per page 10 1-1 of 1

The button (2) "Print QR code for login" will generate a poster with the QR code.

Users and QR code posters

If you want to give access to your SDS library from your intranet, you can simply (3) create a QR code user, scan the QR code and copy the link and add it to your intranet.

The button (4) "Email access link to your team" allow you to share access via email.

You can or click on the image or scan the below QR code with your mobile phone to see how this will look for your employees.

If you want the link to give access to all SDS in your organization, the QR code user must be granted access to all locations.

You can create many "QR code users" – e.g., one for each of your locations, or a "QR code user" that gives access to all the SDSs your organization has in the SDS library.
