

# Users and QR code posters

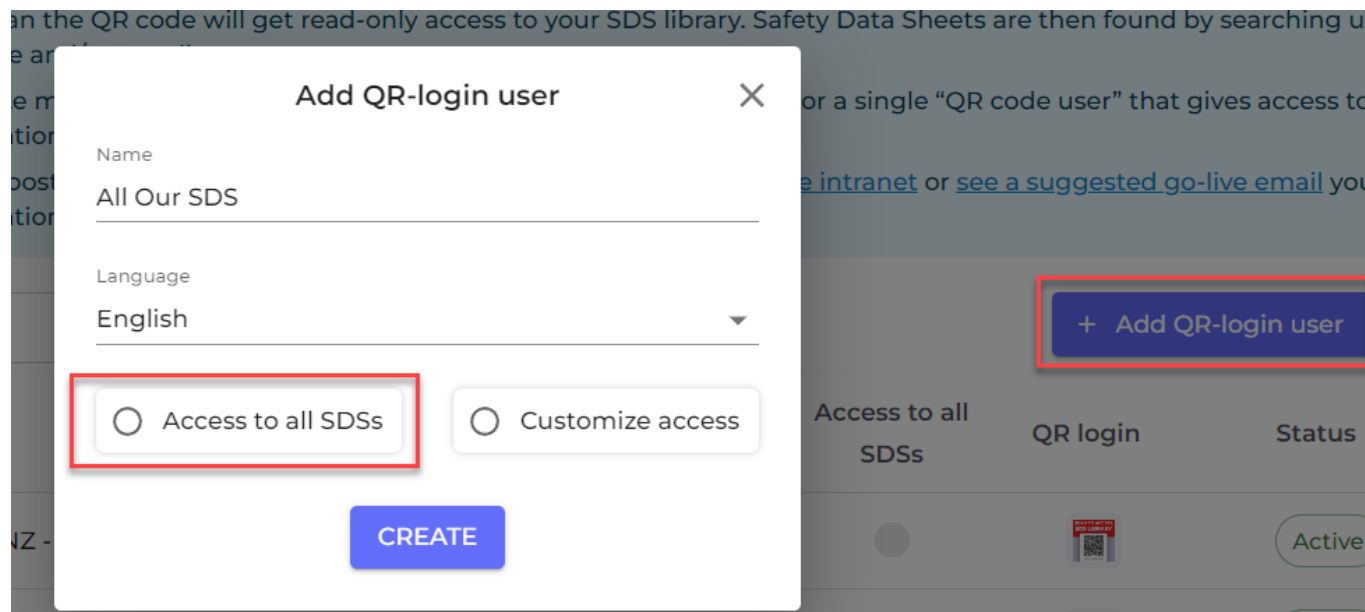

## How can I give our employees access our SDS library via QR code?

A common user for all employees can be created and logged in by a QR code generated by SDS Manager. This user will have 'read-only' access and cannot make any changes to SDS.

To create a QR code user, open [Manage QR codes page \(require login\)](#) and click Add QR login user

If you want the QR code to give access to all SDSs in your organization, you select "Access to all SDSs"

If the QR code should only have access to SDS on some of the SDSs in your company, select "Customoze access".

# Users and QR code posters

an the QR code will get read-only access to your SDS library. Safety Data Sheets are then found by searching us

### Manage QR codes

QR codes give users of chemicals access to Safety Data Sheets by scanning QR codes with their mobile device or via link from your corporate intranet.

Users that scan the QR code will get read-only access to your SDS library. Safety Data Sheets are then found by searching using part of the product name and/or supplier name.

You can create multiple "QR code users" – e.g., one for each of your locations, or a single "QR code user" that gives access to all the SDSs your organization has in the SDS library.

Click the QR poster below to [print QR poster](#), [get URL to add to your corporate intranet](#) or [see a suggested go-live email](#) you can send to your organization.

Search for user
